1 Design – Maschine zur Laserstrahlbearbeitung von Werkstücken

Bystronic Laser AG, Industriestrasse 21, 3362 Niederörs.
Rechtsnachfolgerin des Designers Roman Bloch,
Herzogenbuchsee.

Vertr.: PPS Polyvalent Patent Service AG, Geroldswil

Die Maschine weist einen mittleren Frontbereich auf, welcher partiell durch ineinander schiebbare Türen abdeckbar ist und den Raum zur Laserstrahlbearbeitung enthält. Diese Schiebetüren sind im Wesentlichen winkelförmig und besitzen transparente, vertikale oder leicht geneigte Frontseiten (Fenster), die einen Einblick in die Maschine erlauben. Im geschlossenen Zustand bilden die Schiebetüren einen teleskopartigen Winkel, der von einer Seite der Maschine zur anderen Seite anwächst resp. abnimmt. Im geöffneten Zustand sind im oberen Bereich zu einander parallel Führungsschienen ersichtlich, welche die Maschine optisch begrenzen und zusammen mit den übrigen Randbereichen den Eindruck eines Rahmens ergeben.
